McAllen, Texas 78501

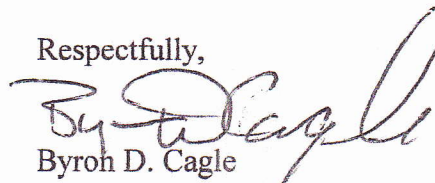

To whom it may concern;

Please be advised that during the month of November, 2010 I had occasion to contract with the above individual and his company to complete a major renovation of the plumbing in my home in McAllen Texas.

The project consisted of removal of all of the old copper plumbing and replacing it with Flex Pipe. This undertaking took a week to complete and involved the cutting of sheetrock to install the new pipes. There were thirty-eight cuts to gain access to remove the pipe. The crew of workers were required to clean up daily and make sure that there was water available to all areas of the house each night.

The project was completed with a minimal disruption to our family. All floors were covered each day and removed at the end of the day. The project, directed by Mr. Filup Trevino, was completed in two additional days at the agreed cost. All work was excellent, the workers polite and respectful, and each day the house was left with minimal disruption. I highly recommend this company and Mr. Trevino for this type of project.

Respectfully,
